Professional Experience

Full-stack Developer | Zetaequis

December 2022 – Present

- Contributed to multiple client-facing web projects, including a large-scale full-stack e-commerce and social platform (BLKMarket) serving 5,000+ registered users, working within a 5–10 person development team
- Built and maintained features across several web applications, including product and content management, order flows with refunds/returns, real-time social feeds, user profiles, and admin dashboards
- Developed a cross-platform mobile application using React Native, published on the App Store and Google Play
- Stack: Next.js, TypeScript, TanStack Query, MongoDB, Shadcn/ui, Leaflet, Pusher, NextAuth, Zod

Featured Projects

Snackly – Headless CMS E-commerce | snackly.site

- Architected and developed a full-featured headless e-commerce platform with dynamic page builder and modular layout engine
- Implemented advanced commerce system: products, categories, coupons, stock management, order lifecycle, and analytics dashboard
- Built a no-code content management system including dynamic sections, form builder, blog engine, and SEO configuration
- Designed customizable navigation, header/footer builder, and theme configuration for white-label deployments
- Integrated authentication, role-based access control, transactional emails (Resend), and real-time analytics
- Stack: Next.js 15, TypeScript, MongoDB, Zod, React Hook Form, Zustand, Recharts

Courtly – Sports Complex Management SaaS | courtly.site

- Designed and developed a multi-tenant SaaS platform for sports facility management and online reservations
- Implemented real-time court availability, booking flows, admin analytics dashboards, and QR-based reservation validation
- Built both owner-facing admin tools and customer-facing features including authentication, interactive map search, and booking management
- Stack: Next.js, TypeScript, TanStack Query, MongoDB, Shadcn/ui, Leaflet, Pusher, NextAuth, Zod

Education

JavaScript & React Development – CoderHouse

Self-taught Developer with continuous learning through real-world projects, official documentation, and modern web development best practices
